INTERNSHIPS

Atozerv - Graphic Designer	2023
Excelling in tasks such as Logo creation , Flyer design , Iconography , Illustrations and Web design . I crafted visually and technically proficient designs. Additionally, I provide design services to individuals and startups by fulfilling their needs. TOOLS - Figma, Canva, and Photoshop, used to achieve the tasks.	
The Better Tomorrow - Web developer	2023
Focused on Front-end technologies like HTML5 , CSS3 , TailwindCSS , ReactJS and developed a To-Do app with a team, through this I learned the Front-end technologies. Also, understand the basic Back-end technologies like NodeJS, ExpressJS and API integrations.	

TECHNICAL SKILLS

Programming Language Java Javascript
Web Technologies HTML5 CSS3 Javascript ReactJS ExpressJS NodeJs TailwindCSS
Query Language MongoDB MySQL
Core concepts C OOPS DBMS
Tools VS code Eclipse Postman Github npm Netlify Vercel Canva Figma

PROJECTS

OrderKT - UI/UX LINK	2024
OrderKT is actually an Amenity Management System. Built with a User-centric approach , its UI/UX design prioritizes Efficiency, Easy of use, and Aesthetic appeal to enhance the experience. Based on this, the color patterns , typography , whitespaces have maintained to create this seamless design.	
TableFit - Web Development	Under Construction
The web app assists college faculty in scheduling classes and maintaining details. On frontend, ReactJS is utilized for its component-based architecture and reusable UI elements. HTML for structure, CSS for styles. Node.js serves as the runtime environment, Express.js facilitates building APIs and handling HTTP requests. MongoDB for storing class schedules and faculty details. My primary role was in frontend development using ReactJS and the back-end was contributed by my team.	

ACHIEVEMENTS

Won cash prize of 2000 in web development competition with amoung 70+ participants	2022
Shortlisted to the third round in Smart India Hackathon amoung 10k+ participants.	2023
